

# Expected ROI of lithium iron phosphate battery project in Turkey 2030

What is the global lithium iron phosphate battery market size?

The global lithium iron phosphate battery market size was estimated at USD 8.25 billion in 2023 and is projected to reach USD 17.48 billion by 2030, growing at a CAGR of 10.5% from 2024 to 2030.

What is the market size of LiFePO<sub>4</sub> batteries in 2023?

Based on application, the market is categorized into portable and stationary. The portable application segment dominated the global market and accounted for more than 50.0% share of the overall revenue in 2023. This is attributed to the high demand for LiFePO<sub>4</sub> batteries from the automotive segment, which is a key demand-generating segment.

Why is the demand for LiFePO<sub>4</sub> batteries increasing?

Demand for LiFePO<sub>4</sub> batteries in the U.S. was driven by increasing concerns regarding ecological degradation owing to pollution from fossil fuels. The presence of key producers and dealers with varied distribution networks will also boost product demand across the country.

Are LiFePO<sub>4</sub> batteries a good alternative energy storage system?

On account of high energy density and long cycle time, LiFePO<sub>4</sub> batteries are projected to be the most favored choice as an alternative energy storage battery system. Therefore, growth in demand for automobiles across countries, such as China, is projected to fuel demand for LiFePO<sub>4</sub> batteries.

**Lithium Iron Phosphate Market Size** The global lithium iron phosphate market size was estimated at USD 2.6 billion in 2024 and is estimated to grow at 20.8% CAGR from 2025 to 2034. LFP has advantage of high thermal stability, longer ...

Lithium iron phosphate is one of the most widely adopted battery chemistries, contributing substantially to the recycling sector. Nonetheless, the recycling of lithium iron phosphate faces challenges due to its relatively lower ...

Similarly, the price for lithium carbonate has fallen from a high of approximately \$70,000 per metric ton to well below \$15,000 in 2024. This article focuses primarily on two of the most sought-after Li-ion battery cathode chemistries in ...
