

Expected ROI of nickel manganese cobalt battery project in Malaysia 2030

What is nickel manganese cobalt (NMC) battery market?

The nickel manganese cobalt (NMC) battery market has been observing significant growth due to growing demand for efficient batteries from different industrial applications such as EV, ESS and many more. This is encouraging several innovative initiations in the industry. Solid-state batteries being one of the advances seen in the field.

Who are the key players in the nickel manganese cobalt (NMC) battery market?

Market players including CATL, Clarios, Exide Technologies, Tesla, Saft are the top 5 companies in the nickel manganese cobalt (NMC) battery market. The key 5 players hold nearly 40% of market share. Among these, CATL is one of the major share holding player in the market.

How much is the NMC battery market worth in 2022?

The NMC market reached USD 21.9 billion, USD 25.8 billion, and USD 30.5 billion in 2022, 2023 and 2024 respectively. The nickel manganese cobalt (NMC) battery market has been observing significant growth due to growing demand for efficient batteries from different industrial applications such as EV, ESS and many more.

Will lithium & cobalt produce more manganese in 2040?

The quantities of material demand for manganese used in LIBs are low in contrast to the high global production volume. However, the calculation for lithium and cobalt predicts a higher material demand in 2040 than the production volume of these battery metals in 2021. In the case of nickel, it depends on the technology and growth scenario.

Will NMC dominate the battery market in 2030?

The high nickel content improves the capacity of the materials and, for instance, increases that of an NMC 811 by almost 50% compared to NMC 111 to about 200 mAh/g (Research Interfaces 2018). It is predicted that NMC with various compositions will dominate 75% of the battery market in 2030 (Zhao 2018). 3.2.1. Medium-Ni materials

How big is the NMC battery market?

The U.S. NMC battery market is projected to exceed USD 35.2 billion by 2034, led by federal and state incentives, stricter emission regulations, and the push for energy grid modernization and renewable energy integration. What is the size of the automotive segment in the NMC battery market?
