

Expected ROI of residential ESS project in Vietnam 2030

What will Vietnam's energy future look like in 2030?

The government anticipates a 10-12% annual surge through 2030 in the nation's power consumption. This rapidly expanding energy demand presents a significant challenge to Vietnam's transforming energy landscape, especially considering the urgent need to reduce global emissions and utilise renewable alternatives.

Will Vietnam's power demand and consumption rise in 2030?

Vietnam's power demand and consumption would rise, posing a threat to the country's energy security. Vietnam's government predicts that electricity consumption to rise at a pace of 10-12 percent per year through 2030, making it one of the fastest-growing power consumption rates in Asia.

What will Vietnam's construction industry look like in 2025?

The analyst expects Vietnam's construction industry to register an annual average growth rate of 6.7% from 2025 to 2028, supported by the government's efforts to develop transport and energy infrastructure in the country.

Can BESS be integrated into Vietnam's power grid?

In an effort to facilitate the integration of BESS into Vietnam's power grid, the Electricity and Renewable Energy Authority (EREA) of the Ministry of Industry and Trade recently hosted a technical workshop in collaboration with GEAPP.

What is the cost of capital for renewable power generation in Vietnam?

Higher cost of capital in Vietnam The weighted average cost of capital (WACC) in local currency (LCY) for renewable power generation in Vietnam is estimated to range from approximately 10% to 15%, depending on the technology (solar, onshore wind and o

How much energy does Vietnam need in 2027?

of 10.9 per cent to 2027 (see Figure 1). Its primary energy demand is expected to increase from 67.7 Mt in 2010 to 186.0 Mt in 2035, an annual growth rate of 4.1 per cent, while its final energy demand has an expected C ent over the same period. 2026605.299 Figure 1.
