

# Expected ROI of residential solar battery project in Romania 2025

How much energy does Romania have in 2025?

At the beginning of 2025, Romania boasts approximately 3,000 MW in wind energy and 1,500 MW in solar energy. An additional 2,424 MW in wind and solar projects is expected to be operational in 2025, attracting over EUR2 billion in investments. Romania's Energy Goals for 2030: Achieve over 32,000 MW in total capacity by 2030.

Will Romania see a surge in photovoltaic projects in 2024 and 2025?

The data shows that 2024 and 2025 might witness a surge in the completion of large-scale photovoltaic (PV) projects in Romania, with over 400 projects expected to contribute significantly to the country's goals. Their total capacity is estimated at 30.5 GW. Obviously, this is the trickiest area in this report.

How much money will be invested in Romania's energy sector?

Today, the Minister of Energy, Sebastian Burduja, announced on Facebook that an additional EUR150 million will be invested in Romania's energy sector. "I am pleased to announce that the Ministry of Energy is launching a new call for projects financed through the Modernization Fund, aimed at investments in energy storage capacities (batteries).

How much money is needed for energy storage projects in Romania?

The projects must focus on building new energy storage capacities in Romania," the minister stated. According to the minister, as quoted by ZF.ro, the total budget for this state aid scheme is EUR150 million in non-reimbursable funds sourced from the Modernization Fund.

How many large-scale solar projects are there in Romania?

As of the latest data available, there are over 880 large-scale PV projects in Romania, boasting a cumulative capacity of approximately 46,600 MW. This impressive number showcases the country's commitment to harnessing solar energy as a clean and sustainable source of power.

Which Romanian companies are adding Bess to their renewable assets?

Other Romania-based companies, such as Parapet and Waldevar Energy, have told pv magazine that adding BESS to their renewable assets is a top priority. The May edition of pv magazine features an in-depth look at Romania's solar and energy storage markets.

A Tesla Powerwall is still therefore not expected to be cost saving for consumers in 2025, however any reductions in installation costs and increases in the life of the battery could make it more attractive. Only a fraction of solar households ...
