

Factory solar storage project financing options in China 2026

In recent times, the Chinese government and state-controlled lenders have taken a more international approach in financing overseas infrastructure projects. The reduced bilateral lending for such projects means Chinese firms need to ...

China could supply a third of its power consumption from renewable sources by 2030, but it needs new energy storage systems to get its solar and wind power on to local grids. This image shows workers checking solar PV modules in ...

China also achieved its 2030 wind and solar capacity target in 2024, six years ahead of schedule. While renewable installations are set to continue, investment growth is expected to slow in 2025 and, in the case of solar PV, even to fall ...
