When comparing to Dyness or Pylontech, what are your thoughts on their specifications and is it worth considering Felicity batteries?

Is Felicity solar a good company?

Felicity Solar is a well-reputable and real knowledgeable in the solar manufacturing business. They might be a little bit more expensive than other solar companies because their product is high end. I have been buying from them since 2018 and their products are still up and running. I upgraded my products to Lithium batteries and hybrid inverter.

Is the Felicity 48300 battery bad for solar?

The Felicity 48300 batteries are yes, reused batteries, which are not bad at all for solar. While lead acid batteries are even worse than the cheapest used lithium iron phosphate (lifepo4) batteries, used lifepo4 batteries are a good option for solar usage. The issue with Felicity batteries is that they are typically under-capacity (around 33% less), and there have been reports of false advertisement.

How much does a Felicity battery cost?

Felicity battery's were priced at 38k each from solarway suppliers. The navitas were priced at approx R20800 ea but I believe the prices has gone up.

Are felicity solar batteries a good price?

On 2022/08/18 at 1:02 AM, Sc00bs said: Have seen the Felicity solar batteries being sold locally as Five Star batteries. My friend bought a 200ah one as a very good price (=40k if I remember correctly) His model however doesn't have a Canbus connection and couldn't get it to speak to his Sunsynk inverter, although the supplier says that it does.

The LiFePO4 Lithium Battery 15 kwh features a 48V high-energy density and a built-in Battery Management System that improves functionality and safety. The solar battery's design is perfect for homes and businesses and it can be ...
