

Fitting batteries to existing solar system

Can I add a battery to my solar system?

So-called "storage ready" systems are already equipped with an inverter that can easily direct excess power into a battery. But even if your system wasn't designed with storage in mind, you still have options. Let's explore how easy it is to add a battery to your existing solar setup and what options you have based on your current equipment.

Can you add battery storage to a solar panel?

The good news is that it's entirely possible to add battery storage to an existing solar panel setup. So-called "storage ready" systems are already equipped with an inverter that can easily direct excess power into a battery. But even if your system wasn't designed with storage in mind, you still have options.

Can you add a battery to a solar inverter?

It's relatively easy to add a battery to your existing solar panel system, but the level of ease depends on the type of solar inverter you have. If your inverter isn't compatible with a battery, the simpler and more affordable solution is to install an AC-coupled battery system.

Can I Retrofit a solar battery to an existing solar panel system?

Yes, it's easy to retrofit a solar battery to an existing solar panel system. Depending on the specifications of your existing system and how much storage capacity you require, we offer four sizes of batteries.

Are solar batteries compatible with existing solar panels?

Most solar batteries designed for small-scale use are compatible with existing solar panel systems. The best battery for your retrofit installation really comes down to your unique needs and reasons for installing an energy storage system.

Can a solar system accommodate a battery?

Most solar systems can accommodate a battery, but the ease of installation depends on your setup. Why trust EnergySage? You installed your rooftop solar system a few years ago and are enjoying your disappearing electric bills. But your neighbor just installed a new solar-plus-storage system that couples rooftop solar with a battery storage system.

How does retrofitting batteries into my existing grid-tied solar system impact my environment? By storing excess sun-energy and reducing reliance on fossil fuels, fitting batteries can help lower greenhouse gas emissions contributing to ...

Adding battery storage to an existing Feed-in Tariff (FIT) site We often get asked if you can add battery storage to an existing solar system that is currently registered for the Feed-in Tariff or FIT scheme. The quick answer is ...

Fitting batteries to existing solar system

How do I find out if I can fit a battery to my existing solar panel system? If you already have solar panels and are considering fitting a battery to your system, get in touch with us using our form below, our live chat, or give us a call on 01268 ...
