

Flow battery system project financing options in Bangladesh 2026

Is energy storage regulated in Bangladesh?

For example, the Bangladesh Energy Regulatory Commission (BERC) Licensing Regulations 2006 do not include rules for licensing of energy storage technologies (except for pumped storage). The institutional framework for the procurement and deployment of such projects is well established in the country.

What can be done about grid connected energy storage in Bangladesh?

Limited experience and knowledge of grid connected energy storage in Bangladesh. Early-stage pilot programmes such as the planned 2MW grid connected BESS funded by the Asian Development Bank (ADB) would further support capacity building and knowledge transfer. 3.3.

Can distribution companies provide electricity solutions for displaced communities in Bangladesh?

There are no service obligations for distribution companies to provide electricity solutions for displaced communities in Bangladesh. Distribution companies and non-governmental organisations (NGOs) (in the absence of service area obligations) would be key institutional stakeholders for the deployment of this application.

How does the power sector support transport in Bangladesh?

The power sector continues to support the ongoing electrification of transport in Bangladesh, through various initiatives undertaken by distribution companies and the roll-out of an EV charging tariff.

What is the financial model for EV-BESS deployment in Bangladesh?

The current financial model for EV-BESS deployment in Bangladesh relies on a service payment to EV-BESS projects. This payment model does not create bankable projects due to the lack of any long-term fixed revenue streams. However, additional commercial revenue streams may be leveraged to improve commercial viability of these projects.

Is the existing PPA model bankable in Bangladesh?

The existing model PPA in Bangladesh is bankable and may be adapted for the deployment of grid connected BESS. The existing PPA model allows for both availability and energy payments. An availability payment model has been recommended for early-stage developments.

It's integral to understanding the long-term value of a solution, including flow batteries. Diving into the specifics, the cost per kWh is calculated by taking the total costs of the battery system (equipment, installation, operation, ...
