What is the battery energy storage system guidebook?

A public benefit corporation, NYSERDA has been advancing energy solutions and working to protect the environment since 1975. The Battery Energy Storage System Guidebook contains information, tools, and step-by-step instructions to support local governments managing battery energy storage system development in their communities.

How are energy storage systems secured?

Rooms, areas and walk-in energy storage system units in which electrochemical energy storage systems are located shall be secured against unauthorized entry and safeguarded in an approved manner.

What are the requirements for dedicated use energy storage system buildings?

For the purpose of Table 1206.14, dedicated use energy storage system buildings shall comply with all the following: The building shall only be used for energy storage systems, electrical energy generation, and other electrical grid related operations. Other occupancy types shall not be permitted in the building.

How do I protect my energy storage system?

Rooms and areas containing energy storage systems shall be protected on the system side by 2-hour rated fire barriers constructed in accordance with Section 707 of the Building Code of New York State and 2-hour rated horizontal assemblies constructed in accordance with Section 711 of the Building Code of New York State, as applicable.

Do energy storage systems comply with the requirements?

Energy storage systems shall comply with the requirements of Sections 1206.11.1 through 1206.11.12.

Are energy storage systems allowed in the same room?

Energy storage systems shall be permitted to be in the same room as the equipment they support. Stationary energy storage systems shall comply with the seismic design requirements in Chapter 16 of the Building Code New York State and shall not exceed the floor loading limitation of the building.
