

Government procurement price of home energy storage in Germany

How many home storage units are there in Germany?

In 2020, more than 100,000 home storage units were implemented across Germany, bringing the total number to 300,000. In 2018, photovoltaic (PV) and energy-storage for households reached grid-parity: storing PV energy with batteries became cheaper than the price from the public power network.

Is Germany a good place to invest in energy storage?

While the demand for energy storage is growing across Europe, Germany remains the European lead target market and the first choice for companies seeking to enter this fast-developing industry. The country stands out as a unique market, development platform and export hub.

Why do we need energy storage systems in Germany?

Increasing the share of renewables poses new challenges: Excess energy produced during off-peak hours needs to be stored and made available when needed. Since energy storage systems (ESS) can balance supply and demand, they are an essential part of Germany's energy transition. In line with this, the market for ESS is constantly growing.

Does Germany have a grid-parity for photovoltaic & energy-storage?

In 2018, photovoltaic (PV) and energy-storage for households reached grid-parity: storing PV energy with batteries became cheaper than the price from the public power network. However, the majority of PV systems in Germany are not yet connected to batteries - in 2018 only 8% were equipped accordingly.

How is energy storage funded in Berlin?

Investments in electricity storage in connection with newly installed photovoltaic systems are also being funded in Berlin through the "EnergiespeicherPLUS" program. If you meet all the initiative's requirements, 300 euros per kWh of storage capacity can be funded - up to 15,000 euros.

Does Germany offer subsidies for battery storage systems?

2013, the German government declared it would offer direct subsidies for battery storage systems. These subsidies would be 30% of the total system cost and connected to the latest distributed solar systems of less than 30KW. This policy was extended to 2018.

4 · Electricity market in Germany Energy sources in Germany Germany's energy sector encompasses a diverse array of sources. The nation has been progressively transitioning towards renewable energy. Renewable energies, ...
