

Government procurement price of industrial energy storage in Poland

Why is energy storage subsidy important in Poland?

Energy storage subsidy programs are crucial to stabilizing Poland's electricity grid. An increase in the number of storage installations affects the flexibility and reliability of the power system. Balancing energy supply and demand. Reducing the load on the grid during peak hours. Integration of renewable energy sources (RES).

How much money does Poland spend on battery energy storage?

Poland has finalized a comprehensive subsidy program aimed at accelerating the deployment of battery energy storage systems (BESS), with a total budget of PLN 4 billion (approximately EUR1 billion).

Can energy storage projects be sited in Poland?

For energy storage projects, there are two potential options for site acquisition in Poland. Firstly, the potential investor may acquire ownership of the property on which the planned project will be sited.

Is energy storage a good investment in Poland?

In Poland, interest in energy storage investment has been evident for some time. Last year's main auction of the power market, with capacity delivery for 2029, further bumped up the capacity of storage projects.

Will energy storage subsidy programs accelerate Poland's energy transition?

The development of energy storage subsidy programs in 2024-2025 has great potential. The planned activities will accelerate Poland's energy transition, supporting the development of technologies and the creation of new jobs in the energy sector. Energy storage subsidy programs are crucial to stabilizing Poland's electricity grid.

Do energy storage projects need a Public Procurement Act?

When an investor in energy storage projects or a purchaser of services concerning energy storage is a public contracting authority, the implementation of such projects may also require the application of the Polish public procurement act (Prawo Zamówień Publicznych).

Polish utility PGE Group is planning to add more than 80 energy storage facilities through to 2035 to the tune of PLN 18 billion (\$4.7 billion). One of these will be the 981 MWh Zarnowiec battery energy storage project, which will ...

Energy storage subsidy programs in Poland are a key component of the country's energy transition. These initiatives support prosumers, businesses and farmers, influencing a greater share of renewables in the energy mix and improving the ...
