

Government procurement price of mobile ESS unit in Korea

Is South Korea a Bess supplier?

South Korea is also a major exporter of batteries and energy storage technologies, with Samsung SDI and LG Energy Solution among significant suppliers of products from cells to complete BESS solutions internationally. According to the newest Basic Plan, the country aims to capture a 30% share of the global BESS market by 2036.

What is ESS central contract market 2025?

South Korea launched the 2025 1st ESS Central Contract Market auction, offering 540 MW of capacity for energy storage projects across the mainland and Jeju. This round expands coverage beyond Jeju, introducing refined procedures and stricter technical and operational standards based on lessons from the initial pilot.

How many megawatts does ESS have?

The Ministry of Trade, Industry and Energy said on May 22 it will open bidding for the installation of ESS facilities with a combined capacity of 540 megawatts. The project marks the first government-led ESS rollout beyond Jeju Island, where initial pilot efforts were previously concentrated.

What is an ESS unit & how does it work?

Often referred to as "electrical reservoirs," ESS units play a vital role in managing renewable energy output. They store surplus electricity generated from sources like solar power during periods of low demand and release it when demand peaks, functioning as auxiliary batteries that stabilize the grid.

How has the ESS market changed over the years?

However, a string of ESS-related fires and a lack of infrastructure had dampened investments in this market. This was a heavy hit for the energy industry, but developments of safer technology and renewed state support have recently given new life to the domestic ESS market.

How much ESS capacity will be allocated in 2025?

The 2025 auction will allocate a total of 540 MW of grid-connected ESS capacity through a competitive selection process, consisting of 500 MW on the mainland and 40 MW on Jeju Island. Projects must have a design capacity that exceeds 10 MW (60 MWh) but remains below 100 MW (600 MWh), and bids must be submitted in increments of 1 MW (6 MWh).
