

Government procurement price of school solar storage in Mexico

Are energy storage projects a luxury in Mexico?

Energy storage projects are still considered as a luxury in Mexico as currently they are too expensive to be financially viable. Energy storage infrastructure will require private sector financing.

Does a policy study affect energy storage deployment in a jurisdiction?

First, it studies regulations and policies qualitatively, but it does not evaluate the quality, intensity, complexity or degree of implementation of these interventions. Second, it does not establish any strict evidence of causality between specific policies and the rate of energy storage deployment in a jurisdiction.

Which countries offer solar-plus-storage incentives?

Germany was the first electricity market to introduce incentives directly targeting residential solar-plus-storage systems. In 2013, the state-owned bank KfW launched programme 275, which offered low-interest loans and investment grants for 30% of the capital costs of solar-plus-storage installations until 2016.

How much money does KfW invest in solar-plus-storage projects?

In 2013, the state-owned bank KfW launched programme 275, which offered low-interest loans and investment grants for 30% of the capital costs of solar-plus-storage installations until 2016. In that period, KfW invested around EUR60 million in almost 19,000 of these projects.
