

Government procurement price of standalone energy storage in France

What is Envision Energy's first independent battery energy storage contract in France?

This project marks Envision Energy's first independent battery energy storage contract in France, following recent successes in Europe. Beginning construction in June 2025, Envision Energy will supply a minimum of a 14 year long-term maintenance (LTSA) agreement, providing continuous presence in the region beyond the construction phase.

Is France a good place to invest in energy storage?

France has also set targets for energy storage capacity by 2028, fostering investments in BESS. While the revenue potential has been positively impacted by recent policies, the overall market for energy storage remains less developed and mature if compared to other EU countries. It is developing however, particularly in large-scale BESS.
