What is Chad energy access scale up project?

To proposed Chad Energy Access Scale Up Project will complement the ongoing activities and accelerate access in secondary cities via mini-grids and in rural areas - via SSS.

Does Chad need solar energy?

Furthermore, the Government of Chad made pledges at the Global Refugee Forum, held in December 2019, to promote the use of solar energy for refugees and host communities and use solar for all existing and new infrastructure in areas hosting refugees and other displaced persons.

Does Chad have a good electricity supply?

Despite the endowment of fossil fuels and solar resources, Chad has among the lowest rates of access to electricity in the world at 6.4 percent (against an Sub-Saharan Africa (SSA) average of 48 percent), with significant disparities between urban and rural areas (20 percent urban, 0.6 percent rural).

How much does it cost to reach universal electricity access in Chad?

The Bank estimates that total costs of reaching universal electricity access in Chad is US\$3.75 billion. Achieving the ambitious electrification objectives will require sustained and sizable public and private resources over a longer period of time and requiring the use of various instruments.

How much does electricity cost in Chad?

In addition, the cost of electricity service is extraordinarily high in Chad (US\$0.43/kWh billed), significantly exceeding the average tariff of US\$0.25/kWh. Even for customers with grid connections, unreliable services negatively impact livelihoods, firm productivity and growth potential.

Does Chad have an off-grid solar market?

Despite the significant levels of solar irradiation in Chad, the off grid solar market remains at its nascent stage, with significant entry barriers. Actual budget transfers to the sector have roughly doubled over four years to reach US\$76 million in 2018, with no tangible improvement in the access rate or quality of service.
