

# Home energy storage cost breakdown in Serbia 2030

What are the key priorities for energy development in Serbia?

Energy security, energy market development, and overall transition to sustainable energy were adopted as key priorities for the energy development of the Republic of Serbia, as well as the principles upon which the energy policy until 2030 needed to be developed.

How is energy policy implemented in Serbia?

The Energy Law envisages that energy policy is elaborated and implemented in more detail through the Energy Sector Development Strategy of the Republic of Serbia, the Strategy Implementation Program, and the Energy Balance of the Republic of Serbia.

How does the transition of Serbia's energy sector affect prices?

The transition of Serbia's energy sector, in the context of the implementation of a new energy strategy, takes place in the turbulent time, first due to changes in demand and the restructuring of global energy markets, and then due to a series of geopolitical challenges, leads to a sudden and uncertain increase in prices of certain forms of energy.

Will there be hydrogen production in Serbia by 2030?

Regarding hydrogen production in the Republic of Serbia, by 2030 the construction of a demo facility for the production, storage, and use of hydrogen can be expected.

What is the trend of energy use in Serbia?

The trend of changes in the use of energy sources in the Republic of Serbia from 2010 to 2021 is shown in Figure 1. There has been a slight decrease in the use of solid fossil fuels (coal) during this period.

What is the energy consumption structure in Serbia?

The structure, by consumption sector, is shown in Figure 23. Energy consumption in households accounts for more than one third of the final energy consumption in the Republic of Serbia. In this sector, more than 70% of energy is used for space heating and hot water preparation.

**Projected Utility-Scale BESS Costs:** Future cost projections for utility-scale BESS are based on a synthesis of cost projections for 4-hour duration systems as described by (Cole and Karmakar, 2023). The share of energy and power ...

Therefore, to account for storage costs as a function of storage duration, we apply the BNEF battery cost reduction projections to the energy (battery) portion of the 4-hour storage and use the (Cole et al., 2021) summary for the remaining ...
