

How to replace seiko solar watch battery

What should I do if my Seiko Watch is not a solar watch?

Before continuing, make sure your watch is not a solar watch. If it is, we recommend delegating to the experts for Seiko solar watch battery replacement. This rechargeable battery is actually a special cell called a capacitor, which should be replaced by a trained watchmaker.

How long can a Seiko solar watch last?

Reliability is the best output from a Seiko solar watch. You can use this solar watch effortlessly for at least 8-10 years without battery replacement. This is because the battery used in the watch is constantly changing by absorbing light.

How to change the battery in a Seiko watch?

To change the battery in a Seiko watch, first inspect the back case of the watch and open it using a tool on the watch insulator area. Place a blanket on the floor or table and put the dial of the watch down before starting the battery replacement process.

Does Seiko solar watch need a battery replacement?

A Seiko solar watch battery replacement is not needed unless the watch is damaged. If replacement is necessary, it is not difficult to get the batteries replaced by visiting a nearby store.

How to recharge a Seiko solar watch?

To recharge a Seiko solar watch, it is necessary to expose it to light. Since room light is weaker compared to sunlight, it takes a longer time to recharge the watch. Therefore, when recharging, please place the watch by a window and expose the dial to the sun.

What tool do you need to remove the back cover of a Seiko solar watch?

First, you need to remove your Seiko solar watch back cover using a special tool or a watch clamp so you can unscrew it. After that, find the existing battery and remove it using tweezers.
