

# Industrial battery cabinet project financing options in Netherlands 2030

Are batteries a sustainable solution to future-proof the Netherlands' electricity system?

Batteries, both BTM and grid-scale FTM (front-of-the-meter), play an important role in mitigating such challenges and offer a sustainable solution to future-proof the Netherlands' electricity system. But how can it integrate more batteries if the grid struggles to handle the current load?

Is the Netherlands a good market for battery storage?

The Netherlands is an emerging market for battery storage but, due to the lack of saturation, also a highly exploitable one. In early 2025, Enspired, together with Flexcity and S4 Energy, reached an exciting milestone by taking the country's first 4-hour BESS live in a cross-market optimization setup.

What technologies are developing in the east of the Netherlands?

Focus on three key technologies that are already developing strongly in the east of the Netherlands: electrical energy engineering, electrochemical energy storage and sustainable drive systems. Smart energy Hub: Smart decentralised energy system that produces, stores and uses sustainable energy locally.

What are the laws & regulations on energy storage in the Netherlands?

No specific laws & regulations: In the Netherlands, energy storage is not described in Dutch laws and regulations as a specific item. Standard requirements: It has to meet standard requirements for production and consumption and some specific technologies that are part of the energy storage system must comply with standardisation.

Are grid managers allowed to buy energy in the Netherlands?

Grid managers are not allowed to buy energy on the market themselves in the Netherlands. Examples of regional grid managers are Liander and Stedin. entrepreneurs who want to become active across borders. Prohibits the placing on the market of certain batteries manufactured with mercury or cadmium. Encourages the recycling of (parts of) batteries.

Is project Mufasa a game-changer for battery storage in the Netherlands?

"Project Mufasa is a game-changer for battery storage in the Netherlands. As the first of its kind to secure full project financing, it proves that energy storage is not just viable--it's investable. Says Arno Hendriks, co-founder of Lion Storage.

The Netherlands will not be able to hit its installed electrolyser capacity targets of 4GW by 2030 and 8GW by 2032 amid rising costs and a lack of firm demand from industry, according to a report by the Dutch government's advisory body, the ...
