

Iraq medicine and energy storage

Does Iraq still use oil?

Iraq will continue to mostly use oil to meet energy demand until it develops more natural gas processing capacity and pipeline infrastructure. Federal Iraq refers to the political entity that is governed by the central government of Iraq in Baghdad.

What type of energy is used in Iraq?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. Iraq: How much of the country's energy comes from nuclear power?

Are pharmaceutical products available on private health insurance in Iraq?

available on private health insurance as it is not commonly used in Iraq (2). This report aims to describe the regulation of pharmaceutical products by the Iraqi Ministry of Health from registration and approval to post-marketing, a

Why is Iraq's energy system vulnerable?

However the capacity to capture and process this gas has not kept pace. The inability to utilise its gas riches means that the country's gas deficit has grown, and Iraq now relies on imports from Iran to meet increasing demand. This has introduced a number of vulnerabilities to Iraq's energy system.

How much money does Iraq spend on health care?

domestic product (GDP) of US\$110.83 billion (133 trillion Iraqi dinars) (2). However, only .5% (about US\$5 billion) of the GDP was allocated to the health care sector. This percentage is low compared with other countries in the Middle East region with comparable GDPs. Government expenditure on pharmaceuticals was US\$1.25 billion

What is the future of electricity supply in Iraq?

There are a number of pathways available for the future of electricity supply in Iraq but the most affordable, reliable and sustainable path requires cutting network losses by half at least, strengthening regional interconnections, putting captured gas to use in efficient power plants, and increasing the share of renewables in the mix.
