

# Is the energy storage science and engineering major good policy

What is the Energy Science and engineering PhD program?

The Energy Science and Engineering PhD program is focused on related energy topics such as renewable energy, global climate change, carbon capture and sequestration, energy storage, and energy systems.

What is an energy master's degree?

Each of the four energy master's degrees are based in engineering, aligned with new discoveries in science, attuned to sustainability and the environment, and informed by a broader perspective in economics and public policy.

What types of programs can I pursue with a degree in energy?

The flexibility allows students in energy related programs such as agricultural and biological, chemical, electrical, environmental, mechanical, nuclear, and petroleum engineering, materials science and engineering, industrial health and safety, and business and finance to have dual or concurrent degrees, minors, or options.

What is Energy Science & Engineering?

The Energy Science and Engineering curriculum provides a sound background in basic sciences and their application to practical problems to address the complex and changing nature of the field. Coursework includes the fundamentals of physics, chemistry, geology, computational physics, numerical analysis, and engineering science.

What can you do with a degree in energy management?

In addition, the program prepares students to be successful leaders in advancing the technology and management of energy; innovators and entrepreneurs in the energy sector; and educators, practicing engineers, and national leaders in the energy and associated environmental health and safety, policy and economic fields.

Who accredits the Bachelor of Science in energy engineering?

The Bachelor of Science in Energy Engineering at University Park is accredited by the Engineering Accreditation Commission of ABET under the commission's General Criteria with no applicable program criteria.
