

Italian electrochemical energy storage fire extinguishing system

Are large-scale fire extinguishing experiments necessary?

Therefore, before the fire extinguishing agent is used in energy storage stations, large-scale fire extinguishing experiments are necessary to truly evaluate the effectiveness and authenticity of the fire extinguishing agents and methods.

How to protect battery energy storage stations from fire?

High-quality fire extinguishing agents and effective fire extinguishing strategies are the main means and necessary measures to suppress disasters in the design of battery energy storage stations. Traditional fire extinguishing methods include isolation, asphyxiation, cooling, and chemical suppression.

Which fire extinguishing agents are used for battery fires?

Based on the understanding of fire extinguishing mechanism, new fire extinguishing agents have been developed for battery fires, such as hydrogel fire extinguishing agents and liquid nitrogen fire extinguishing agents.

Are lithium-ion battery energy storage systems fire safe?

With the advantages of high energy density, short response time and low economic cost, utility-scale lithium-ion battery energy storage systems are built and installed around the world. However, due to the thermal runaway characteristics of lithium-ion batteries, much more attention is attracted to the fire safety of battery energy storage systems.

How to extinguish a battery fire in a BESS?

Among them, the most common method in BESSs is the spraying method. There are several nozzles arranged inside the container, and the fire extinguishing agent is sprayed in an umbrella shape, covering a large area when extinguishing the battery fire. Long-term spraying has a good cooling effect.

What is water mist fire extinguishing method?

Water mist fire extinguishing method is suitable for small energy storage battery modules. Just in case, large energy storage stations generally do not use water mist to extinguish fires due to the high voltage environment of several thousand volts.
