What is Japan's policy on battery technology for energy storage systems?

Japan's policy towards battery technology for energy storage systems is outlined in both Japan's 2014 Strategic Energy Plan and the 2014 revision of the Japan Revitalization Strategy. In Japan's Revitalization strategy, Japan has the stated goal to capture 50% of the global market for storage batteries by 2020. 2. The Energy Storage Sector a.

Is Japan a good place for battery-based energy storage?

Compared to Japan's peers in the G20 and the OECD, Japan's market characteristics and energy landscape provide exceptionally ideal conditions not only for the energy storage sector as a whole, but also for the rise and implementation of battery-based energy storage in particular.

What energy storage technology does Japan use?

In terms of energy storage technology, Japan is supported primarily by pumped hydro and by NaS and Li-ion battery storage capability, according to the US Department of Energy.<sup>88</sup> While Japan is the world leader in NaS battery energy storage technology, it is also the world's second manufacturer of Pb-Acid energy storage systems.

What types of batteries are used in Japan's energy storage landscape?

Various battery technology types are represented in Japan's energy storage landscape. These range in diversity, from large-scale NaS sites with output capacity of up to 50 mW, to wind-farm-based VRFB facilities, to a 600 kW facility built of aggregated Li-ion electric vehicle batteries.

How big is Japan's battery market?

According to National Policy Unit estimates, Japan's total storage battery market size is  $\$165.930$  Billion (according to 2011 figures).<sup>90</sup> In terms of energy storage usage, Japan's battery-based energy storage market is growing aggressively.

What is Japan's first energy storage project?

In 2015, we started Japan's first demonstration project covering energy storage connected to the power grid in the Koshikishima, Satsumasendai City, Kagoshima. This project is still operating in a stable manner today. One feature of our grid energy storage system is that it utilizes reused batteries from EVs.
