

How big is Japan's battery storage market?

In the commercial space, Japan's battery storage market was valued at USD 593.2 million in 2023 and is projected to reach USD 4.15 billion by 2030. While commercial installations currently dominate revenues, industrial adoption is expected to scale faster. Utility-scale storage is also gaining ground.

Why are Japanese companies investing in battery energy storage systems?

That is creating surging interest in battery energy storage systems (BESS) to smooth mismatches in supply and demand. Since December 2023, companies have announced investments of at least \$2.6 billion in Japanese battery storage projects, according to calculations by Reuters.

Is Japan a good place for battery-based energy storage?

Compared to Japan's peers in the G20 and the OECD, Japan's market characteristics and energy landscape provide exceptionally ideal conditions not only for the energy storage sector as a whole, but also for the rise and implementation of battery-based energy storage in particular.

What is Japan's policy on battery technology for energy storage systems?

Japan's policy towards battery technology for energy storage systems is outlined in both Japan's 2014 Strategic Energy Plan and the 2014 revision of the Japan Revitalization Strategy. In Japan's Revitalization strategy, Japan has the stated goal to capture 50% of the global market for storage batteries by 2020. 2. The Energy Storage Sector a.

What is the future of battery storage in Japan?

At the residential level, where battery storage capacities are projected at 100,000 to 250,000 kW, life-span is also projected to increase 50 to 100%. Other small-scale uses, such as data center backup energy storage are projected by NEDO to become commercially widespread in Japan before 2020.

Can Eku Energy commercialise large-scale batteries in Japan?

For Eku Energy, the LTDA is important to the business model of its Japanese projects but the developer, perhaps best known for projects in the UK and Australia, sees three pathways to commercialisation for large-scale batteries in Japan. The company secured a 20-year tolling agreement for its first Japan project, the 30MW/120MWh Hirohara BESS.
