

How big is Japan's battery storage market?

In the commercial space, Japan's battery storage market was valued at USD 593.2 million in 2023 and is projected to reach USD 4.15 billion by 2030. While commercial installations currently dominate revenues, industrial adoption is expected to scale faster. Utility-scale storage is also gaining ground.

Who are the top tier battery brands in Japan?

Get hard to find intelligence on your customers, suppliers, partners and competitors-backed with on-the-ground data. Top-tier brands dominate the market: Panasonic and LG Energy Solution lead the Japan lithium-ion battery market with a strong focus on electric vehicles (EV) and large-scale energy storage systems.

Can Eku Energy commercialise large-scale batteries in Japan?

For Eku Energy, the LTDA is important to the business model of its Japanese projects but the developer, perhaps best known for projects in the UK and Australia, sees three pathways to commercialisation for large-scale batteries in Japan. The company secured a 20-year tolling agreement for its first Japan project, the 30MW/120MWh Hirohara BESS.

What is Japan's energy storage policy?

As policy, technology, and decarbonization goals converge, Japan is positioning energy storage as a critical link between its climate targets and energy reliability. Japan's energy storage policy is anchored by the Ministry of Economy, Trade and Industry (METI), which outlined its ambitions in the 6th Strategic Energy Plan, adopted in 2021.

How is Japan's energy storage landscape changing?

Japan's energy storage landscape is shifting, pushed by household demand, corporate ESG mandates, and domestic battery manufacturing. The residential lithium-ion market, projected to grow at a CAGR of 33.9% through 2030, remains one of the fastest-expanding segments.

Where are Furukawa batteries made?

Furukawa Battery started their business in 1950 and is located in Yokohama, Japan. They produce batteries for the automotive industry, commonly used in cars all across Asia. Their main product is lead-acid batteries, lithium-ion batteries, and energy storage systems.
