

Junghans mega solar battery replacement

What battery does Junghans Mega 1 have?

What about the battery? Junghans equipped the Mega 1 with a standard 3 Volt coin cell battery, CR2025. These are widely available and last 2-3 years in the watch. Can I replace the strap?

What can we do After fitting a new battery in my Junghans?

After fitting a new battery in your Junghans we can also check that the watch is resealed to its original specification. We have state of the art Witschi watch pressure check equipment on-site in our Birmingham service center. We can pressure check any watch from water resistant to a fully waterproof watch for diving.

Should I replace my Junghans watch glasses?

Replacing watch glasses is necessary if there is a crack. As this will allow moisture and other contamination into the watch. In most cases, there would be shards of glass on the watch dial. If it is left, it can get into the mechanism resulting in the watch needing a full service. Why choose RWR for your Junghans watch repair?

Do you repair Junghans watches?

From full movement overhauls to crystal replacements and precision cleaning, our team regularly performs a number of Junghans repairs. Our team of Swiss-trained watchmakers and repair technicians pride themselves on their quality work and are intimately familiar with Junghans movements and components on both automatic and quartz models.
