

Kobalt battery charger solid red

After inserting the battery into the charger, if you see the solid red light illuminate, it's a warning of extreme battery temperature. If your battery is too hot or too cold, the charger contains smart technology that warns you ...

I have two Kobalt 80v power equipment chargers. One works fine with all four 2AH batteries, and the other starts up when the battery is inserted (safety relay by pins), detects charge and begins charging (flashing green led and battery ...
