

# LFP battery system cost breakdown in Vietnam 2026

How much does an LFP cell cost in 2024?

The average price of an LFP cell was just under \$60/kWh in 2024. Currently, Greater China has a near monopoly in LFP cell manufacturing, considering the negligible LFP production capacity in Europe and North America. However, LFP production capacity is poised to expand, especially in Europe, through this decade.

Are LFP batteries the future of energy storage?

LFP batteries are evolving from an alternative solution to the dominant force in energy storage. With advancing technology and economies of scale, costs could drop below \$0.3/Wh (\$0.04/Wh) by 2030, propelling global installations beyond 2,000GWh.

Are LFP batteries cheaper than ternary batteries?

Plummeting Costs: By 2023, LFP battery costs fell below \$0.6/Wh (\$0.08/Wh), 30% cheaper than ternary batteries. - Safety Imperative: Post-2021 fire incidents at ternary battery storage facilities accelerated the global shift toward LFP technology. II. Four Core Technical Advantages of LFP Batteries 1. Superior Thermal Stability

What is the market share of LFP battery technology in 2021?

Driven by this, the output of LFP battery technology outstripped the NMC output in May 2021 in China, a country with a 79% share in the global lithium-ion battery manufacturing capacity in 2021. As can be seen above, the prediction for the market share of LiB technologies in the following years is challenging.

Will LFP increase the global average price of LFP cells?

The addition of LFP capacities outside of Greater China will raise the global average price of LFP cells in the midterm, but as the manufacturing cost is brought under control through process improvements, the global LFP average cell price will gradually fall below the current level.

Why did battery prices fall 20% in 2024?

The IEA's report claims that battery pack prices fell by 20% in 2024, marking the largest decline since 2017. This decline was driven by low critical mineral prices and intense competition, which squeezed margins, particularly in China.

Current Year (2022): The 2022 cost breakdown for the 2023 ATB is based on (Ramasamy et al., 2022) and is in 2021\$. Within the ATB Data spreadsheet, costs are separated into energy and power cost estimates, which allows capital ...
