

Laos electrical energy storage system equipment manufacturing

Where do electrical and electronic goods come from in Laos?

Electrical and electronic goods in Laos are mainly imported from neighboring countries. Lao PDR has been a member of the IEC affiliate countries and adopted IEC standards for 50 electrical and electronics products as Lao national standards.

What is the main energy source in Lao PDR?

The second highest consumed energy source was oil products. There are no oil refineries in Lao PDR,so imports come from Thailand and Vietnam. In 2013,Lao PDR's total primary energy supply (TPEC) was 2.47 MToe. The primary energy mix was oil,hydropower,coal,and biomass.

How much solar power does Lao PDR have?

Lao PDR has an average of 200-300 sunlight days per year,with a potential capacity of solar energy of 4.5-5.0 kWh/m²; per day. Solar power,while not the main energy source,has incredible potential to play a critical role in off-grid electric power for remote rural areas.

What is hydropower in Lao PDR?

Hydropower is a key source of electrical energyin Lao PDR. The Mekong river sub-basins have approximately 20,000 MW of viable hydropower potential; by 2013,2,971 MW of this had been developed. Most hydropower dams are on tributaries on the Mekong River and supply over 3,240 MW of hydropower.

What are the challenges facing Laos' energy sector?

Cooperation with private parties,other governmental agencies and development partners will also play a critical role. The key challenges facing Laos' energy sector and its expansion are: 7 rural populations that are difficult to reach. UXO-contaminated regions of the country.

How does Lao PDR work?

Lao PDR works to use its central location to its economic advantage,specifically as a land-locked country. 8 Laos trades a great deal of electricity with Thailand and its other neighboring countries Vietnam and Cambodia.
