

Large scale battery storage supplier quotation in Spain 2030

What is Spain's battery storage market?

Spain's battery storage market is dominated by customer-sited systems. Utility-scale storage remains nascent. Currently, Spain's storage market is mainly composed of small-scale batteries co-located with solar PV. Spain's household electricity prices now stand at over EUR 0.30/kWh on average.

How will battery storage work in Spain?

Following its launch in Italy last year, the business will deploy battery storage in Spain, driving progress towards the country's 2030 clean power target and deployment goals for renewable energy. Batteries create a reliable, greener and more flexible grid which will improve energy security and enable the transition to net zero.

Why should Spain invest in batteries?

Batteries create a reliable, greener and more flexible grid which will improve energy security and enable the transition to net zero. With ambitious targets, Spain is rapidly deploying renewable energy to decarbonise its grid and expects to increase clean energy generation to 81% by 2030.

How big will solar batteries be by 2030?

It is hoped these batteries will have a capacity equivalent to approximately 2.5GW by 2030. While participants in Spain's renewable energy auction last month were permitted to include bids with energy storage, the technology didn't feature.

Why should you invest in Toni battery storage in Spain?

Amit Gudka, CEO, Field: "Toni brings deep expertise to our operations in Spain, an important market as we expand across Europe and work to achieve a net zero future. Without battery storage, renewable energy cannot scale at the pace the world needs to decarbonise.

Will Spain achieve 20GW of storage by 2030?

In addition, Spain has developed a national storage roadmap that includes a target to achieve 20GW of storage by 2030. However, current levels of customer-sited storage adoption already exceed its 2030 targets.³⁷ To date, neither has been sufficiently attractive to mobilize investments at scale.

Storage that is currently available in Spain comes mainly from pumped hydro and concentrated solar power (CSP) plants, to which the government wants to add large-scale batteries, behind-the-metre batteries -- minimum 400 MW in 2030 - ...

AMSTERDAM, December 10, 2024 - Stellantis and CATL today announced they have reached an agreement to invest up to EUR4.1 billion to form a joint venture that will build a large-scale European lithium iron
