

Long-term energy storage forum

What is long duration energy storage?

Long duration energy storage is defined as a technology storing energy in various forms including chemical, thermal, mechanical, or electrochemical. These resources dispatch energy or heat for extended periods of time ranging from 8 hours, to days, weeks, or seasons. LDES is critical for decarbonising the energy sectors.

What is energy storage Forum?

We are Europe's first conference dedicated solely to energy storage since 2010. All of our Forum's culminate with the unique Building the Action Plan feature. Join us for this session and take back an action list to the workplace.

What is the long-duration energy storage portfolio?

The Long-Duration Energy Storage portfolio helps to advance LDES systems toward widespread commercial deployment. The goal of this portfolio is to fund projects that will overcome the technical and institutional barriers that exist for deployment, with a focus on different technology types for a diverse set of regions.

What is long-duration energy storage (LDEs)?

Today's energy storage technologies are not sufficiently scaled or affordable enough to meet energy demand that fluctuates throughout the day and night. Long-duration energy storage (LDES) is a cost-effective option to increase grid reliability and resilience so that reliable, affordable electricity is available whenever and wherever to everyone.

Why do we need energy storage technologies?

From providing critical backup power during natural disasters to supporting more renewable energy coming online, energy storage technologies make the grid more flexible and resilient. Today's energy storage technologies are not sufficiently scaled or affordable enough to meet energy demand that fluctuates throughout the day and night.

What is the long-duration energy storage pilot program?

Long-Duration Energy Storage Pilot Program: These projects will advance a diverse set of LDES technologies towards commercial viability and utility-scale demonstrations. Read the OCED News Alert announcing the Notice of Funding Opportunity, published September 2024.
