

Low-cost iron trichloride cathode for all-solid-state lithium-ion batteries

Potentially significant for both electric vehicles and large-scale energy storage systems, the research group's findings were published in the paper "Low-cost iron trichloride cathode for all-solid-state lithium-ion batteries" ...

A multi-institutional research team has developed a new, low-cost cathode that could radically improve lithium-ion batteries (LIBs) -- potentially transforming the electric vehicle (EV) market and large-scale energy storage ...

Low-cost iron trichloride cathode for all-solid-state lithium-ion batteries
