

Microgrid storage supplier quotation in Belgium 2030

Are grid-side energy storage projects a good idea in Belgium?

Grid-side energy storage projects in Belgium have good prospects, thanks to low grid charges, no double charging policies, and diversified revenue sources. In 2023, 11 new battery projects in Belgium have been awarded capacity market contracts, totaling more than 363 MW.

Does Switzerland need grid-scale battery storage?

Switzerland, as a power transit country with strong grid connectivity, has limited demand for grid-scale battery storage despite having close to 4 GW of pumped storage capacity. The Belgian energy storage market is expected to grow from 491 MW in 2023 to 3.6 GW in 2030, and pre-table energy storage will grow rapidly.

What funding is available for R&I projects in Belgium?

Belgium: Energy Transition Fund. Support for R&I projects for energy. In this context, several publicly funded R&I projects which also include storage, are being performed by Belgian research centres. The funding for energy related R&I projects in 2022 amounts to 25 million EUR.

Who manages a distribution grid?

The distribution grid operators (DSO): They manage mid-voltage grids (10 to 70 kV) and the distribution grid.
The energy suppliers: They supply power to customers, both private and business. The balance responsible party (BRP): They buy the electricity for the supplier and have an obligation to supply the agreed amount per time-unit.
