

Moonray solar batteries

Can Moonray charge a 12V battery with a single solar panel?

MoonRay features an optimized MPPT algorithm for a lower solar panel voltage. It is also adapted for a solar panel Vmp in the range of 17 to 25 Volts. This to charge a 12V battery with a single solar panel or likewise many solar panels. (remember that parallel is the best solar panel installation on a yacht/motorhome)

Does Moonrays offer a warranty?

Moonrays offers a standard one-year warranty on most of its solar lighting products. For detailed information, consult your product manual or reach out to Moonrays Customer Support. **HOW DO I REPLACE THE BATTERY IN MY SOLAR LIGHT?** Replacing the battery is generally straightforward.

Is a Moonray a good solar panel?

The MoonRay is a high performer even if with a non-optimized random size on the solar panel (s). In other words, choose your solar panel size/watt without limitation. The MoonRay will harvest more during the natural power fluctuations up and down. And is not limited to perfect angles and solar irradiation.

How long does a Moonray solar panel take to charge?

Allow the solar panel to charge in direct sunlight for at least 6-8 hours. For more specific instructions related to your model, consult the product manual. If you encounter issues, you may also reach out to Moonrays Customer Support for further assistance. **HOW DO I TURN ON MY CRACKLE BALL PATHWAY LIGHT?**

How do you replace a solar light battery?

Replacing the battery is generally straightforward. Open the battery compartment, usually located near the solar panel or on the underside of the unit. Remove the old battery and insert a new one of the same type. Make sure to dispose of the old battery properly. **CAN I USE MY SOLAR LIGHTS INDOORS?**
