

National grid energy storage station battery tender

Can a customer charge a battery storage system from the grid?

Customers who don't have a renewable energy system but do have an energy storage system that charges from the electricity grid may participate in ConnectedSolutions. If the customer will be discharging electricity to the grid, they must go through the normal interconnection process. Can I charge my battery storage system from the grid? Yes.

What is National Grid's sustainability policy?

National Grid's Sustainability Policy outlines our ambition to transform the way we do business and provide a sustainable legacy as a result of our operations. We expect our suppliers to support this approach. We use the Achilles Utilities Vendor Database (UVDB) when compiling lists of potential suppliers for our goods and services requirements.

Does National Grid have a supplier portal?

For the majority of our purchases, it is a condition of supplying to National Grid that vendors are registered with us on our supplier portal. Our procurement team is happy to answer any questions you have. Download a list of the goods and services we procure, along with contact details.
