What is arc stud welding?

STUD WELDING PROCESS An arc is created between the face of the stud and the surface of the workpiece,causing both surfaces to melt and allowing the stud to be smoothly attached. This results in a joint strength greater than the base material or the stud alone. **TYPES OF STUD WELDING** Capacitor Discharge (CD) Stud Welding Arc Stud Welding

How do you use a stud welding machine?

Use a stud welding machine to weld pins on sheet metal, place insulation through the welded pins, press a self-locking washer onto the pin, and then bend or clip the pin to complete the fastening process. **COMPREHENSIVE PRODUCT RANGE** A full range of stud welding equipment to meet diverse needs and applications. **EXTENSIVE INDUSTRY EXPERIENCE**
