

# Off grid battery system project financing options in Singapore 2025

What is Singapore's biggest battery storage project?

Singapore has surpassed its 2025 energy storage deployment target three years early, with the official opening of the biggest battery storage project in Southeast Asia. The opening was hosted by the 200MW/285MWh battery energy storage system (BESS) project's developer Sembcorp, together with Singapore's Energy Market Authority (EMA).

How are battery storage solutions transforming the energy landscape?

Australia is a prime example of how battery storage solutions are transforming the energy landscape. Australia's National Electricity Market (NEM) is transitioning from a centralised coal-fired generation system to a diverse mix of renewable sources of energy.

What are some path-breaking battery storage projects?

Here are two path-breaking battery storage projects. DBS is the Mandated Lead Arranger and Modelling Bank for Vena Energy's 100MW/150MWh Wandoan South Battery Project, Australia's first-ever project financing of a utility-scale battery project.

Should the grid be able to support an intermittent power source?

"The power source should be able to supply to the grid as needed rather than when the source is generating power. And the grid must be able to support such an intermittent operation." The intermittent nature of renewables has long challenged the large-scale adoption of renewable energy.

What is a battery stacking project?

In 2025, a battery stacking project was piloted to increase the storage capacity to 326MWh. It is the first operational ESS to be expanded vertically, delivering more power within the same footprint. A rail-guided battery stacking method was implemented to safely position the batteries without the use of large crane.

Should BESS projects be proposed in Singapore?

One industry source told Energy-Storage.news recently that proposing BESS projects for development in Singapore is challenging given the lack of space in urban areas of the densely populated territory, and commensurate regulations on fire safety and urban planning, among other things.
