

Office building energy storage cost breakdown in Chile 2030

How many energy storage projects are in Chile?

Currently, 36 of the 129 large-scale projects Latin America projects with an energy storage component under development are in Chile, including 32 out of 71 of the region's early works projects. The storage technologies either in use or being considered include:

Are battery energy storage systems a viable alternative for Chilean power producers?

With transmission lines at overcapacity and permitting delays slowing the development of new grid infrastructure, battery energy storage systems (BESS) have surged as a profitable alternative for Chilean power producers.

How much will battery costs fall by 2030?

Battery costs have fallen by 90% in the last 15 years, and the cost of utility-scale storage projects is projected to fall by 40% by 2030, according to a recent International Energy Agency report. Seebach notes that "this is an incredibly fast race, and you need regulation to generate confidence for investment."

Projected Utility-Scale BESS Costs: Future cost projections for utility-scale BESS are based on a synthesis of cost projections for 4-hour duration systems as described by (Cole and Karmakar, 2023). The share of energy and power ...
