

How is energy policy implemented in Serbia?

The Energy Law envisages that energy policy is elaborated and implemented in more detail through the Energy Sector Development Strategy of the Republic of Serbia, the Strategy Implementation Program, and the Energy Balance of the Republic of Serbia.

How does the transition of Serbia's energy sector affect prices?

The transition of Serbia's energy sector, in the context of the implementation of a new energy strategy, takes place in the turbulent time, first due to changes in demand and the restructuring of global energy markets, and then due to a series of geopolitical challenges, leads to a sudden and uncertain increase in prices of certain forms of energy.

Where can I find total energy balance of the Republic of Serbia?

Total Energy Balance of the Republic of Serbia for chosen year is available [HERE](#). Construction of energy balances according to the old Eurostat concept can be realised on data which are in the database called Annual data - archive. The data were archived by the end of 2017 and will not be corrected in the future.

Is the energy balance closed within the Serbian power system?

The performed software simulations show that the energy balance is closed within the system, without reliance on interconnection, that is, without dependence on imports. In this sense, it was on the side of safety, i.e. the regulatory reserves of the Serbian power system were considered exclusively.

Will building renovations reduce unemployment in Serbia?

More specifically, it is estimated that by 2040, around 3 to 5 thousand young people with higher education should be newly employed in the mentioned areas, throughout Serbia, mostly in technical and natural sciences. The building renovation program has a particularly high potential to reduce unemployment.

Delivering the utmost flexibility to the Serbian government, the Large-Scale Solar and Battery Energy Storage Project being developed by UGT Renewables will be owned and operated by Electric Power Industry of Serbia (EPS) once completed.

Warehouse and storage, office, and service buildings together accounted for almost one-half (48%) of all commercial buildings. Warehouse and storage, office, and education buildings accounted for one-half of total commercial building ...
