

Office building energy storage tender price in Canada 2026

What is the largest storage-based procurement in Canada?

The IESO issued the largest storage-based procurement in Canada in February 2023 with the Expedited Long-Term 1 RFP (the ELT1). The ELT1 resulted in a total of 739 MW of utility-scale storage being procured, with in-service dates in 2026. The weighted average price for successful proponents was approximately CAD836/MW.

Where can I view and bid on tender opportunities?

Department of Public Works and Government... Department of Public Works and Government... Register your business to view and bid on tender opportunities published by Public Services and Procurement Canada. Get an overview of our policies and guidelines, procurement process, and more.

What is the fastest growing energy storage technology in Canada?

BESS is the fastest growing energy storage technology in Canada and is also the dominant storage technology in terms of capacity and number of sites. All but four projects proposed to be commissioned by 2030 are battery storage, with two CAES and two PHS projects also proposed.

Are utility-scale energy storage systems coming to Canada?

By Kristyn Annis Chair, Energy Storage Canada Partner, Border Ladner Gervais, Toronto February 19, 2024
The last three years have seen utility-scale energy storage systems proliferate in Canada like never before.

How much energy would a storage asset cost in 2022?

When combined with a marginal cost offer, the total energy offer would be \$376/MWh - or nearly eight times the average HOEP in 2022. Storage assets that are operated more infrequently will require much higher energy offers - in some cases, higher than the ceiling price in Ontario's wholesale energy market.

Is energy storage a new economic frontier?

With the country's target to reach zero-net emissions by 2050, energy storage is a strategic component in the energy transition and a new economic frontier. Accordingly, opportunities for energy storage development and financing are rising, similar to the heightened interest in the solar technologies a decade ago.

The energy storage market in Canada is poised for exponential growth. Increasing electricity demand to charge electric vehicles, industrial electrification, and the production of hydrogen are just some of the factors that will drive this ...
