

Ordering energy storage capacitors from italy

How does itelcond energy storage system work?

Itelcond's Energy storage systems are designed according to the Customer's needs, totally customizable through the choices of the most suitable components. The assembly of power modules, bus bars, capacitors and other components constitute a complete system that is then tested and shipped.

What type of capacitors are available?

AC filter capacitors -- with a polypropylene dielectric, a capacitance tolerance of $\pm 5\%$, and a reliable operating life of up to 100,000 hours, available in capacitance variants from 50 to 300 μF . Power capacitors from the LNK MC, P5Y, P6X, P7Y, and P8Y series -- available in various input and output voltage variants.

What is ICAR capacitor?

ICAR primarily manufactures capacitors with solid dielectric materials, intended for use in power electronics. The company also offers a wide range of products, including capacitors for DC link circuits (so-called DC link capacitors), as well as various passive components (capacitors, resistors, fuses, filters) and power capacitors.

Why should you choose Gruppo Energia?

High quality capacitors for automotive, inverters, UPS, renewable energy, inductive heating and soldering equipment. Are you looking for specific configurations and designs? Gruppo Energia specialises in manufacturing capacitors in order to be able to provide you with the reliable, efficient and tailor-made solutions YOU need.

Does Gruppo Energia have a distributor in China?

Gruppo Energia denies the possession of any facility, distributor, agent or representative in China. We have evidence that several companies based in China are offering counterfeit products with our logo and brand name, calling themselves our representatives or distributors. Gruppo Energia has never collaborated with these companies.
