

Origin solar battery

Why should you use a solar system with origin?

Harnessing and using clean, renewable energy from the sun makes you less reliant on traditional sources of electricity like fossil fuels. Plus if you're looking to lower your carbon emissions by using more of the energy your system generates, you can consider solar batteries as well. How do I install a solar system with Origin?

Why do solar panels need batteries?

Batteries capture and store unused energy generated by your solar panels for you to use when the sun isn't shining. By harnessing natural energy from the sun, it's a cleaner way to power your home and achieve energy independence. When it comes to renewable energy solutions, solar panels are just the beginning.

What is a solar battery & how does it work?

Your battery stores excess solar power your home doesn't need to use right away. This means that when the sun goes down, you'll be able to use that energy instead of relying on the grid, where electricity is still largely produced from traditional fossil fuels.

Should I add a battery to my solar system?

Adding a battery to your solar system can help reduce your electricity bills by lowering your reliance on grid-supplied energy, as you'll be able to draw from your own supply of stored energy. Your battery stores excess solar power your home doesn't need to use right away.

Are solar batteries a long-term investment?

Solar batteries are a long-term investment, so it's important to be sure the one you pick is right for your home's needs. Solar batteries are a long-term investment, so don't miss our expert tips on choosing the right battery for your home's needs. Connect, share and manage power as part of the Origin Loop network.

Do I need a solar battery storage device?

You'll need to add a solar battery storage device to your solar system if you'd like to use solar power at night or on overcast days. Storing solar energy and drawing on your battery's power until it's empty is a great way to increase your solar self-sufficiency and be less reliant on traditional energy sources. Not sure where to start?
