

Outdoor energy storage battery promotion survey

Why should you choose our outdoor battery storage system?

Our outdoor battery storage system offers scalable capacity to future-proof your energy needs. Whether for industrial lithium battery storage or commercial lithium battery storage, you can seamlessly expand storage as your business grows, thanks to our modular design.

Should a battery/energy storage provider provide project capacity?

A battery and/or energy storage provider should only provide project capacity for entire project. This is so that we can correctly align the whole-project information with other sources. The battery/energy storage supplier needs to supply at least 10MW or 10MWh of product to the project for it to be relevant to tiering.

Who uses EnerBlock outdoor battery storage system?

Our EnerBlock outdoor battery storage system supports a wide range of industries, including manufacturing, data centers, hospitals, and utility companies. Designed as a robust industrial lithium battery storage solution, it provides backup power, peak shaving, and grid stabilization for uninterrupted operations.

What is included in the battery storage update?

This battery storage update includes summary data and visualizations on the capacity of large-scale battery storage systems by region and ownership type, battery storage co-located systems, applications served by battery storage, battery storage installation costs, and small-scale battery storage trends.

What certifications does our outdoor energy storage system meet?

Our outdoor energy storage system meets rigorous international standards, including GB/T 36558, IEC 62933, UL1973, and UL9540A. These certifications ensure top-tier safety and performance, making it a trusted option for battery technology for industrial use and commercial energy needs. Do not hesitate and fill the request form.

How can energy storage manufacturers help the tiering list?

Energy storage manufacturers can help BloombergNEF assess them accurately for the tiering list by sending us data (at batterytier1@bloomberg.net) on the projects they have provided batteries and/or energy storage systems for. This data must include enough information to identify the project uniquely.
