

Outdoor large energy storage power station

Why should you buy a portable power station?

Bring big backup power with you with these expert-recommended portable power stations, which can store enough power to charge electronics, appliances, and more.

What is the best portable power station?

With a great power-to-weight ratio, the latest version of the Bluetti Elite 200 V2 is a great portable power station for powering a camper or providing backup power for the essentials. With its tremendous capacity, the EcoFlow Delta Pro 3 is truly capable of providing a whole-home backup without gas or solar panels.

How much does a power station weigh?

A power station's portability is directly related to its power capacity and output. Small power stations with around 300 watt hours of capacity and a max output of 300 watts, such as the Anker Solix C300 DC portable power station, typically weigh under 10 pounds and are about the size of a lunch box.

How long does a power station last?

Exactly how long depends on the amount of watts the devices connected to the power station draw. You can roughly estimate how long a power station will last by dividing the amount of watts devices are drawing from it by its watt hours. Keep in mind that the usable watt hours are not the same as the watt hours listed on the power station's label.

Who uses EnerBlock outdoor battery storage system?

Our EnerBlock outdoor battery storage system supports a wide range of industries, including manufacturing, data centers, hospitals, and utility companies. Designed as a robust industrial lithium battery storage solution, it provides backup power, peak shaving, and grid stabilization for uninterrupted operations.

Why should you choose our outdoor battery storage system?

Our outdoor battery storage system offers scalable capacity to future-proof your energy needs. Whether for industrial lithium battery storage or commercial lithium battery storage, you can seamlessly expand storage as your business grows, thanks to our modular design.
