

PV energy storage project financing options in Norway 2026

How much solar power does Norway have in 2023?

In 2023, solar PV provided 1% of the electricity into the Finnish grid (Electricity Maps, 2024). Norway, having had plenty of hydropower, only recently began to tap into solar energy. The Norwegian Water Resources and Energy Directorate (NVE, 2024) reported a total installed capacity of around 0.6 GW by the end of 2023.

What is the Norfund investee Sael?

The Norfund investee SAEL is dedicated to providing sustainable and affordable energy solutions by converting agricultural waste into energy and promoting renewable energy projects.

Will solar PV grow in 2023?

Globally, renewable energy capacity continues to grow each year. In 2023, around 500 GW of new capacity was added, where solar PV accounts for three-quarters of the total additions worldwide. DNV's Energy Transition Outlook forecast solar PV to grow 13-fold to 2050 compared to 2022 levels, reaching 18 TW of total installed solar PV capacity.

How does solar project financing work?

Solar projects leverage project finance, using cashflows to repay loans and distribute risks, making renewable energy developments more feasible. Over the past few decades, the landscape of renewable energy project financing has evolved significantly.

Does Norway have a battery market?

Today Norway has not one, but two huge battery markets. "There are two market drivers for batteries: EVs and stationary energy storage. Energy storage is coming on strong now. It's the key to turning intermittent wind and solar into a stable energy source," explains Pål Runde, Head of Battery Norway.

How much solar power does Norway have?

The Norwegian Water Resources and Energy Directorate (NVE, 2024) reported a total installed capacity of around 0.6 GW by the end of 2023. About half of the capacity is installed on households - the rest for industrial and commercial use, with a very limited Utility scale solar.

The rapid growth in the energy storage market is similarly driving demand for project financing. Like any other project-financed asset class, lenders will analyze both the amount and probability of receiving cash flows generated ...
