

Will Europe's home battery market increase by 2026?

Predominantly positive market conditions and supportive framework conditions, as expected in additional countries in the medium term, will most likely increase the annual home battery market in Europe to 7.3 GWh by 2026, according to the SPE study.

What is the market share of Bess batteries in 2023?

With a 72.3% market share, lithium-ion batteries dominate grid scale BESS applications and are set to remain the top choice for future needs. Germany led the European BESS market in 2023, with a 34% share, followed by Italy at 22% and the UK at 15%.

What percentage of Germany's roof surfaces are equipped with photovoltaics?

So far, only a small percentage of Germany's roof surfaces is equipped with photovoltaics. Recently, however, a significant increase in the installation of such systems has been observed. In 2023 alone, photovoltaic systems were installed on 3% of residential buildings with one or two apartments.

Are all regions in Germany suitable for rooftop photovoltaics?

Household rooftop photovoltaics, which accounted for more than half of all systems installed in Germany in 2023, play an important role here. But not all regions in Germany are equally suitable for their installation. The purpose of this study is to identify regions which still have a particularly high potential for new installations.

How will photovoltaic capacity grow in 2026?

Annual targets can also be derived from the federal government's plans, which illustrate the growth pattern: The coming years will be characterised by strong, double-digit growth in photovoltaics. The annual increase in capacity is set to rise to over 22 GWp/a from 2026. By way of comparison, a record 14 GWp of new capacity was added in 2023.

What is the growth rate of photovoltaics?

Please send any comments or suggestions for improvement to both simon.philipps@ise.fraunhofer.de and warmuth@pse-projects.de Photovoltaics is a fast-growing market: The Compound Annual Growth Rate (CAGR) of cumulative PV installations was about 27% between the years 2014 and 2024. Wafer size increased.

Fixed operation and maintenance costs will remain stable at 2.5% of capital costs, while rapid declines in battery pack costs are anticipated to influence overall ESS pricing, similar to historical trends in photovoltaic systems, enhancing ...
