Can pika smart batteries integrate with existing solar energy systems?

New capability enables integration of Pika Smart Batteries into existing solar energy systems. Pika Energy has announced new capabilities that will enable any PV system owner to couple Pika Energy storage to their existing solar array.

What is pika energy?

Pika Energy is the maker of the Pika Energy Island(TM), the most powerful solar-plus-storage system on the market. Pika's Harbor(TM) smart battery series is powered by Panasonic Li-ion technology and features more power, capacity and capability than any other residential smart battery on the market.

What is a pika smart battery?

Pika's Harbor(TM) smart battery series is powered by Panasonic Li-ion technology and features more power, capacity and capability than any other residential smart battery on the market. Pika Energy's products are developed and manufactured in the United States and are sold and installed throughout the United States, Puerto Rico and Canada.

How much power does a pika solar storage system provide?

Pika's storage systems are especially valuable to solar system owners in coastal and storm-prone areas in need of a reliable extended backup solution. On its own, the Pika Energy Island(TM) solar plus storage can supply up to 50A of backup power, enough to power the average American home.

Is pika a good energy storage system?

"The new capability offered by Pika will give tens of thousands of PV system owners access to one of the best energy storage systems available on the market," said Mukesh Sethi, General Manager, Solar and Energy Storage Division, Panasonic Eco-Solutions North America, a division of Panasonic Corporation of North America.

How many kWh does pika energy use?

Pika's line-up now ranges from 8.6 kWh to 17.1 kWh of useable capacity. "Our goal is to provide the most powerful, longest lasting and seamlessly integrated energy system for our customers." said Ben Polito, CEO of Pika Energy.
