What is a transportable energy storage system?

Referred to as transportable energy storage systems, MESSs are generally vehicle-mounted container battery systems equipped with standard-ized physical interfaces to allow for plug-and-play operation. Their transportation could be powered by a diesel engine or the energy from the batteries themselves.

What is mobile energy storage?

In addition to microgrid support, mobile energy storage can be used to transport energy from an available energy resource to the outage area if the outage is not widespread. A MESS can move outside the affected area, charge, and then travel back to deliver energy to a microgrid.

Does power Edison have a mobile energy storage system?

Power Edison has deployed mobile energy storage systems for over five years, offering utility-scale plug-and-play solutions. In 2021, Nomad Trans-portable Power Systems released three commercially available MESS units with energy capacities ranging from 660 kWh to 2 MWh.

Does Consolidated Edison have a mobile energy storage system?

In 2016, Consolidated Edison of New York announced their plans to develop an 800 kWh MESS unit with ElectroVaya, a lithium-ion battery company. Power Edison has deployed mobile energy storage systems for over five years, offering utility-scale plug-and-play solutions.

Can mobile energy storage improve power grid resilience?

As mobile energy storage is often coupled with mobile emergency generators or electric buses, those technologies are also considered in the review. Allocation of these resources for power grid resilience enhancement requires modeling of both the transportation system constraints and the power grid operational constraints.

How does mobile energy storage improve distribution system resilience?

Mobile energy storage increases distribution system resilience by mitigating outages that would likely follow a severe weather event or a natural disaster. This decreases the amount of customer demand that is not met during the outage and shortens the duration of the outage for supported customers.
