

# Price of solar panels per kWh

How much does a solar system cost per kWh?

This number, the cost per kWh is then used to compare that price to the price you pay to your electricity company. Generally speaking, a typical solar system in the U.S. can produce electricity at the cost of \$0.06 to \$0.08 per kilowatt-hour.

How much do solar panels cost?

The price of solar panels changes depending on where you live, but the average for installation is just under \$29,000 or \$2.75 per watt. On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about the national average price for a 7-kW system.

How much does a 5kW Solar System cost?

According to the National Renewable Energy Laboratory (NREL), a typical U.S. household installs a 5kW solar system. The solar panel cost is a portion of the total price you have to pay for installing solar panels. At the current average cost of \$2.71 per Watt, a typical 5kW system will cost you \$13,550.

How much does a commercial solar system cost?

Commercial solar installations are a great way for companies to lower energy costs. Generally, installing solar panels on businesses costs a bit less per watt because the systems are larger, but the total costs will be higher. In 2025, the average cost for commercial solar panels is just about \$2.00 per watt.

How much does solar installation cost?

On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about the national average price for a 7-kW system. What else affects solar installation costs?

How much does solar power cost in 2025?

Take control of your energy costs with solar power. Solar panels generate "free" electricity, but installing a system still costs money. A typical American household needs a 10-kilowatt (kW) system to adequately power their home, which costs \$28,241 in 2025.

The biggest factor that impacts the price of a solar battery is its capacity - the total amount of energy that it can store. For instance, there are 5 kWh batteries used mostly for improving the economics of solar, and there are 40 kWh ...
