

# Profit analysis of energy storage cells of haineng industry

How can energy storage be profitable in China?

Actively support the diversified development of user-side energy storage. Encourage user-side energy storage such as electric vehicles and uninterruptible power supplies to participate in system peak and frequency regulation. Explore new energy storage models and new formats . Energy storage can be profitable with policy subsidies in China.

What are the emerging energy storage business models?

The independent energy storage model under the spot power market and the shared energy storage model are emerging energy storage business models. They emphasized the independent status of energy storage. The energy storage has truly been upgraded from an auxiliary industry to the main industry.

Is energy storage a profitable business model?

Although academic analysis finds that business models for energy storage are largely unprofitable, annual deployment of storage capacity is globally on the rise (IEA,2020). One reason may be generous subsidy support and non-financial drivers like a first-mover advantage (Wood Mackenzie,2019).

What are the two stages of energy storage in China?

The first stage (during China's 13th Five-Year Plan period) realizes the energy storage from the R&D demonstration stage to the initial stage of commercialization; the second stage (during China's 14th Five-Year Plan period) realizes the energy storage from the initial stage of commercialization to the stage of large-scale development.

What are the application scenarios of energy storage in China?

It also introduces the application scenarios of energy storage on the power generation side, transmission and distribution side, user side and microgrid of the power system in detail. Section 3 introduces six business models of energy storage in China and analyzes their practical applications.

How to make the energy storage industry more standardized?

In order to make the energy storage industry more standardized, the business model of energy storage should be studied in depth. 3. Development of various energy storage business models in China
