

# Public shared energy storage station

Does a shared storage system have a complementarity of power generation and consumption?

In this context, considering the complementarity of power generation and consumption behavior among different prosumers, this paper proposes an energy storage sharing framework towards a community, to analyze the investment behavior for shared storage system at the design phase and energy interaction among participants at the operation phase.

Why is shared energy storage system important?

Shared energy storage system ensures the economic feasibility of all participants. With the rapid development of distributed renewable energy, energy storage system plays an increasingly prominent role in ensuring efficient operation of power system in local communities.

Are shared energy storage rates correlated with shared charging/discharging power?

In the shared energy storage mechanism proposed in this paper, the contribution rates of all prosumers are positively correlated with their shared charging/discharging power, that is, the greater the shared charging/discharging power, the more the cost-saving of prosumers.

What is a demand side energy storage sharing framework?

A demand side energy storage sharing framework with energy capacity and power capacity sharing is proposed, which introduces the transaction process and profit allocation method of the shared energy system.

Can prosumers own energy storage system?

With the rapid development of distributed renewable energy, energy storage system plays an increasingly prominent role in ensuring efficient operation of power system in local communities. However, high investment cost and long payback period make it impossible for prosumers to own the storage system.

Does energy storage play a significant role in smart grids and energy systems?

Abstract: Energy storage (ES) plays a significant role in modern smart grids and energy systems. To facilitate and improve the utilization of ES, appropriate system design and operational strategies should be adopted.
